Agricultural Conservation Planning

The Lake County Soil & Water Conservation District (SWCD) created a position that assisted the SWCD and coordinated with the Natural Resources Conservation Service district conservationist to create conservation planning task packets. These packets are necessary to enroll eligible applicants into Farm Bill Programs. The conservation plans are consistent with Agricultural Management Measures identified in the 61279(g) guidance. The long term result of this project was an increased number of conservation practices on the ground within the coastal watershed. Task packages created include: conservation plan map package, environmental data package, reconnaissance package, wetland/HELC determination package, wetland slide request submittal package, and miscellaneous package.

RESULT: Funding of a position within the Lake County Soil & Water Conservation District.
